

Inland Technologies International Limited

Job Description

Position: Processing Equipment Operator

Reporting Structure: Site Operations Supervisor/Operations Manager

Definition:

The Processing Equipment Operator is responsible for the safe and efficient daily operation of the glycol concentrators and all other processing equipment while abiding by all of Inland's policies and procedures.

Primary Responsibilities

- To monitor glycol processing equipment units to assure optimum production and efficiency.
- To maintain glycol processing equipment as per Inland's maintenance manuals and SOP's in order to perform any and all maintenance functions as directed by management.
- To complete and distribute daily glycol processing equipment production reports neatly and accurately.
- To perform quality assurance sampling of all production processes at regular intervals during shifts, by using correct sampling protocol as established by Inland SOP's and to ensure that all samples are in compliance with all written company and Government rules and regulations.
- To abide by Health and Safety principles by using issued and available safety equipment as required by SOP's in the day-by-day operations of the facility.
- To maintain a clean, safe and hazard free workplace at all times.
- To keep all Inland owned or managed equipment, tools and materials in good working condition; including keeping the aforementioned clean and in their assigned storage areas when not in use.
- To report to management any possible improvements to the manufacturing process.
- To complete necessary repairs when needed on a timely basis such as; replacing parts, blowers, plumbing new lines and re-plumbing oil lines, installing valves, meters, sensors, etc.
- To work cooperatively with all other staff involved in the completion of assigned duties and to maintain communications between other employees and shifts about current conditions of machines.

- To work cooperatively with airport authority and outside contractor(s) while representing yourself in the best image for the company.
- Escort non security badge holding personnel in accordance with airport written escorting procedures.
- To ensure that the processing equipment and associated recycling equipment are continually inspected and maintained in proactive manner.
- To perform truck transfer operations which include both loading and unloading of tankers, and transfers of fluid between tanks.
- To perform product quality testing and ensure accurate reporting and accounting.
- To perform water quality testing and reporting in relation to SOP's.
- To assist in glycol recovery operations when required.
- To diligently execute any and all other job related duties assigned by management.

Physical Requirements

- The employee must occasionally lift and/or move up to 50 pounds. Specific vision abilities required by this job include distance vision, color vision, peripheral vision, depth perception and ability to adjust focus.
